

# Confluence 5.0 Upgrade Issue Log

Priority Value: **CRITICAL** NORMAL

Current Status value: **OPEN** CLOSED **UPGRADE WITH ISSUE**

Test Case	Priority	Description	Tester	Date Submitted	Assigned To	Resolution
C-003		<p>Signup using invalid domain -</p> <p>No error occurs - screen just sits there when you hit Sign Up</p> <p>Should receive this error when you click on Sign UP:</p>  <p>Tested in IE...</p>	Diane	3/18/15	David	
C-007		<p>Space logo is distorted on several sites that use custom logo. This is a design change to 5.0.</p> <p>New format causes many of the existing ones to become distorted or missing. Not very popular with customers.</p> 	Diane	3/18/15	David	See relevant child page below.
C-007		 <p>Findings: <a href="https://confluence.atlassian.com/display/DOC/Using+Mentions">https://confluence.atlassian.com/display/DOC/Using+Mentions</a></p> <p><b>User Feedback:</b> Why are we getting "@" after the page / comment is published? That looks so weird. It looks perfect in Edit Mode</p> <p>where you are just getting the Firstname Lastname but once you save, it changes to "@Firstname Lastname"</p> <p><b>Answer:</b> we changed the design of this in 5.0 to both highlight this as a special item that you can interact with (i.e.: mousing over it)</p> <p>and more specifically to your question, added the @ symbol to help make people aware of the shortcut for creating mentions</p>	Diane	3/18/15	David	<p>"@" appears if link is made via Confluence avoided if link is made via Confluence Wiki See this page for an example: <a href="https://itd-1e/display/SharedServices/Home">https://itd-1e/display/SharedServices/Home</a>.</p> <p>Note: To remove "@" from existing pages links.</p>

C-007		<p>Space logos missing or too small on spaces using custom logos.</p> 	Diane			<p>Workaround is to change theme back to l on landing page to bring you to the sideb of contents from 4.3 but any newly create sidebar.</p>
C-018		<p>Create Blog Post in the 5.0 Doc space</p> <p>Result: Blog posted correctly to space but the email that it generated included the Welcome Letter that David is working on.</p> <p>Add this to issue log.</p>	Diane		David	<p>Removed Welcome Letter reference from confluence/templates/html/includes/title.</p>
A-015/C-002		<p>Create/Sign-up for a user account</p> <p>Result: New user received email verification but no Welcome Letter (customized User Management Plugin not being used in 4.3 so letters are no longer being sent)</p>	Diane		David	<p>Decision made to generate 'Welcome Let</p>
C-009		<ul style="list-style-type: none"> <li>• <b>Cursor does not always appear in Edit</b> When I edit a word document using Firefox, there's no longer a cursor. If you start to type the text does appear.</li> </ul>	Diane			<p>Found Workaround - Click on pageTitle</p>
C-009		<p><b>Editor not full height in FireFox</b></p>	Diane
