

# Integrating with JIRA

## Integrating with JIRA

JIRA is Atlassian's issue tracking system. Confluence and JIRA can be used together, allowing the integration of a content management solution with an issue tracker. For example, the [JIRA Issues macro](#) can be used to display a list of JIRA issues on your Confluence page:

JIRA Issues Macro: JIRA project does not exist or you do not have permission to view it.

The JIRA server didn't understand your search query. If you entered JQL, please ensure that it's correctly formed. If you entered an issue key, ensure that it exists and you have permission to view it.

For more information on Atlassian's founding product please see the [JIRA webpage](#) or, alternatively, learn [how to pronounce 'JIRA'](#)
